

Helpful Hints

- There are two kit options- Metallic or Standard. The crystal balloons are considered 'metallic' balloons for the purpose of ordering kits.
- The different finishes on the balloons:
 - Metallic-Pearly shiny finish (best seen with Pearl White balloon)
 - Crystal – See through coloured (best seen with Crystal Yellow balloon)
 - Standard- Plastic-type finish (best seen with White balloon)
- We have made the colours of the balloons as close as possible to the actual balloon colours - please be aware though that the digital colours may vary slightly from monitor to monitor. If you need to match colours exactly please call us on 4950 9561 and speak to one of our customer service staff.
- When choosing your balloon types and colours, crystal and metallic balloons mix very well, however we do not suggest mixing standard balloons with metallic as the finishes of the balloons do not tend to match very well.
- Silver and Pearl White metallic balloons are very similar in colour (silver is slightly greyer than pearl white). We suggest that if you want to brighten your balloons up that you choose pearl white- you can always choose metallic silver ribbons in your kit to add shiny silver to your colours.
- Because Apple Green becomes a yellow-green colour when inflated, we usually suggest Lime Green to customers who are after a bright green colour or if they already have yellow in their mix of colours.
- When choosing the colour combinations of your balloons, don't forget the ribbons! You can either choose matching or reversed ribbon colours, single colour, pre-clipped or metallic. Our friendly staff will discuss the options with you when you are ready to place your order.
